

## PHP Web Developer

**Location:** Reading, Berkshire

We are on the lookout for a highly motivated and talented PHP developer to join our growing business. You will be responsible for the production of Workbooks' website, taking ownership of the full development cycle from CMS setup, integration and front-end coding to optimisation, deployment and on-going support.

Technically minded with good interpersonal skills and a natural attention to detail, you will have the ability to communicate with non-technical colleagues to implement new functionality and propose innovative solutions to requirements.

Additionally, a keen interest in digital and tech industries is needed to help Workbooks stay up-to-date with best practices and opportunities to ensure we are a leading presence.

Think you are up for the challenge?

### **What you'll be doing:**

- Primarily maintaining and extending our Drupal based website and community sites, including the development of custom PHP extensions
- Analysis, specification, design, development and testing of PHP applications that integrate with the Workbooks platform and third-party applications
- Working with the Service Delivery team to clearly define requirements for customer application development
- Pro-actively provide guidance and suggestions for improvements to the website implementation and functionality

### **Your Skills and Experience:**

#### **Essential:**

- Expert knowledge of PHP
- Proven ability to develop Web Applications using HTML/CSS, JQuery/AJAX, PHP
- Full Software Lifecycle Experience. (Specification, Implementation & Testing)
- Attention to detail and a high standard of work
- Experience of one or more Content Management Systems.
- Use of source code control systems, such as Github or Subversion
- A willingness to learn new skills and 'go the extra mile'
- Good interpersonal skills and a being a team player
- Problem solving, task prioritisation, communication, administration and organisation skills

#### **Bonus points for:**

- Knowledge of Drupal version 8
- LAMP environment (Linux, Apache, MySQL & PHP) experience
- Ability to use Photoshop/GIMP and such software

### **About Workbooks**

Headquartered at Reading, United Kingdom, [Workbooks](http://Workbooks.com) delivers cloud-based CRM and business applications to growing and mid-market organisations, at an affordable price.

We value our customers and our aim is to make them more successful, which is reflected in everything we do. Our culture is one of co-operation, creativity and commitment. We're also very friendly and sociable - we've been known to have movie nights, company outings and plenty of cakes!
